

➤ **Centre Manager**

The purpose of this role is to lead and manage the dialysis clinic to deliver holistic care for patients. The role includes all aspects of clinic management to achieve maximum efficiency and cost effectiveness in the facility, whilst maintaining a safe environment for optimal patient care.

Centre managers also collaborate with healthcare and allied health professionals to achieve quality outcomes in the day-to-day management of the dialysis patients under the care of their clinic. This role is also responsible for the professional development of staff in the clinic, ensuring continuous education for the benefit of staff and patients.

Educational Qualifications: Bachelor's degree in Hospital Administration/Management
