

➤ **Staff Nurse || Dialysis Nurse**

This role is designed to support the Center manager/Senior Dialysis Technician and fill the role in their absence, leading and managing the dialysis clinic to deliver holistic care for patients. This role assists with all aspects of clinic management to achieve maximum efficiency and cost effectiveness in the facility, whilst maintaining a safe environment for optimal patient care.

Staff nurses support collaboration with healthcare and allied health professionals to achieve quality outcomes in the day-to-day management of the dialysis patients under the care of their clinic. This role also supports the professional development of staff in the clinic, ensuring continuous education for the benefit of staff and patients. Staff nurses may also be tasked to work on special or ad-hoc projects assigned by the head office.

**Educational Qualifications:** Bachelor's Degree in Science (Nursing 3 years full time course) or Diploma in General Nursing and Mid-wifery or Auxiliary Nurse Mid-wifery
